

2BM GDPR SUITE

Are you GDPR compliant yet?

Many companies still have personal data not accounted for in SAP and tasks to perform in that respect before they can call themselves GDPR compliant. If you are one of them, the **2BM GDPR Suite for SAP** can help you. It starts with security and keeping personal data safe from unauthorized access. Then you can move on to locating data across modules and extract reports to get an overview of all the personal data stored on your SAP system. These are the first steps towards GDPR compliance. The next step is deciding what to do with the data. Obsolete and outdated employee data can be deleted and here you can use the GDPR Suite's operational deletion tool.

The analytical and operational tools are easy to use and provide value for money: They are implemented quickly, greatly reduce the risks of being non-compliant, and help you document compliance.

GDPR compliance in SAP

The GDPR Suite for SAP consists of tools for analysis as well as operation. With the 2BM Security Dashboard, you get an overview of your security parameters in SAP. The suite's Data Discovery tool assists with identification of employee data in every nook and corner of SAP, while the Subject Access Report tool lets you handle personal data requests easily by extracting data across the different SAP modules. Finally, the Deletion tool helps you delete personal data. The 2BM GDPR Suite for SAP covers all aspects of the GDPR and greatly reduces your risk of being non-compliant.

The 2BM GDPR Suite is based on our own best practice approaches and we continuously develop the tools to support our customers to become GDPR compliant.

KEY FEATURES

- Easy and simple configuration
- Simple end user functionality
- Easy reporting and extraction of personal and sensitive data in SAP
- Brings transparency into personal and sensitive data in SAP
- Continuous development with input from data protection agencies and our clients.

KEY BENEFITS

- Helps you identify improvement potential for personal data processing
- Helps you become GDPR compliant
- Low TCO and implementation cost.

2BM AS YOUR PARTNER

The 2BM GDPR Suite for SAP is a toolset that reduces the implementation and operational costs of compliant personal data administration. The analytical tools create an overview of the personal data and identify where the data is stored, and the operational tools help you carry out the tasks identified by the analytical reports.

All the tools are fast and easy to implement, and they are continuously developed using the insight from data protection agencies as well as our customers. With a long track record for developing IT tools, we have created a tool suite that puts you on the fast track to GDPR compliance.
